Godrej Storage Solutions

LIFECYCLE SERVICES

SUSTAINED PRODUCTIVITY IN YOUR WAREHOUSE

When it comes to warehouses, safety and productivity are the first order of business. To ensure efficiency in storage and safety of material movement, regular audit, maintenance, upkeep and sometimes upgradation of storage systems, are smart investments to make. Deterioration, damage or dents in storage systems compromise safety, affect operations and productivity, often leading to business losses and sometimes human injury.

As leading warehouse storage solution providers, and one of the few to offer bespoke lifecycle services, Godrej Storage Solutions helps reduce operational downtime and extend the life of your storage systems.

ENSURING HEALTH OF YOUR INSTALLED STORAGE SYSTEMS:

1 Audit, Testing, and Certification:

We offer an approved safety audit report for your storage system in line with European standards (EN 15635). The audit is followed up with recommendations for repair and replacement where applicable.

Audit Checkpoints:

| | | | | |
|--|--|---|---|---|
|  <p>Identify damaged components</p> |  <p>Check for overloading</p> |  <p>Calibrate upright straightness</p> |  <p>Check for safety accessories</p> |  <p>Classify damages and risks</p> |
|--|--|---|---|---|

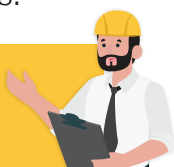

Testing and Certification:

Expert personnel and state-of-the-art laboratory for analysing and certifying warehouse storage systems.

Book an audit and make your warehouse safe!

☎ 1800-419-7060

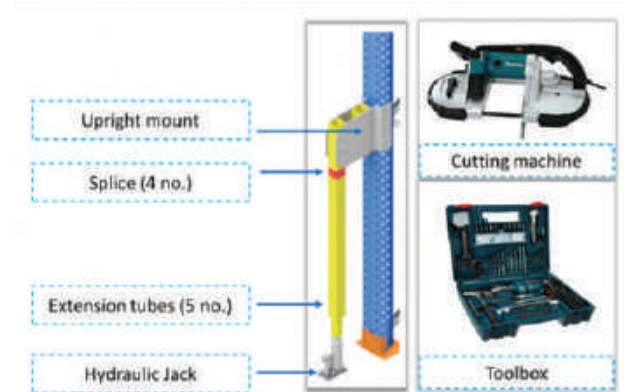

2 Rack Repair:

Aware that downtime has an impact on business operations, Godrej Rack Repair Service is designed to restore the safety and stability of your racking system. Rack repair is conducted based on the audit report by replacing or repairing the components of the system.

Godrej Rack Repair Kit:

It ensures the restoration of the racking system in less than an hour without the system getting dismantled, and in strict adherence to compliance mandates.

3 System Upgradation:

Changing market dynamics put pressure on the supply chain to operate more efficiently, safely and at greater speed. This might necessitate upgrading your storage systems to facilitate more secure, smoother material movement and faster turnaround.

WE OFFER

Solution re-engineering

Safety Upgradation

Seismic Retrofit

Before

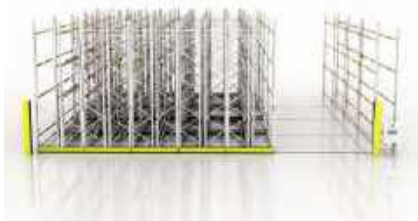

After

Changing Single tier to Multi-Tier HDS

Before

After

Changing Static pallet racking to Mobile Pallet Racking

Solution Re-engineering:

- Re-configuration of loading levels
- Vertical expansion
- Changing static pallet racking to mobile pallet racking
- Moving from wide aisle racking to VNA racking
- Modifying drive-in racking to shuttle racking
- Changing shelving to bin flow racking
- Conversion of walkway panel: Plain/Perforated/Wood/Grating and much more

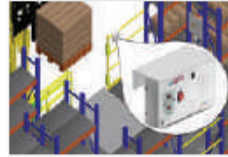

Safety Upgradation:

Safety accessories to protect and extend the life of your storage systems.

Row Guard

Prevents the row of racks from MHE hits.

Safe Gate

Improves safety during the loading operation. Alerts the operator with a warning signal when the loading gate is open.

Upright Guard

Protects uprights from MHE hit and ensures safe movement of MHEs.

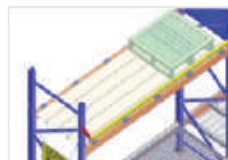

MHE Collision Avoidance System (mCAS)

Alerts the MHE operator/aisle workers about MHE or people moving in the blind spot areas.

Load Checkpoint

Alerts the operator on excessive loads. Enables the operator to check the load carried by the trolley & HPT before they are moved to the walkway panels.

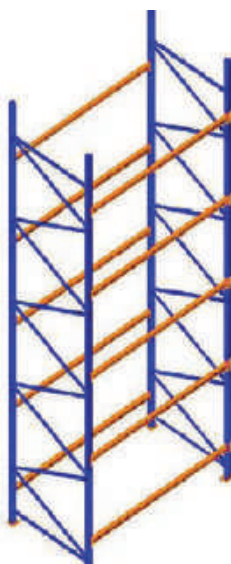

Pallet Stopper

Ensures proper placement of pallets and prevents pallet fall.

Seismic Retrofit:

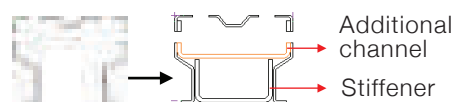

In earthquake-prone areas, we convert existing non-seismic racks to seismic-resistant racks by retrofitting necessary structural components. Our retrofitting process is in compliance with international seismic codes (EN 16681, ANSI MH 16.1– RMI, UBC/IC).

Non-seismic system

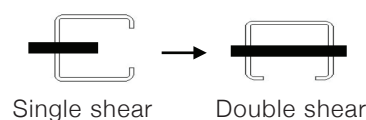

Seismic resistant system

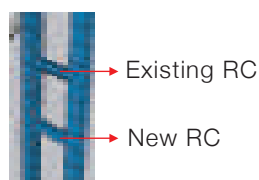

Upright strengthening

Frame bracing strengthening

Adding row connector

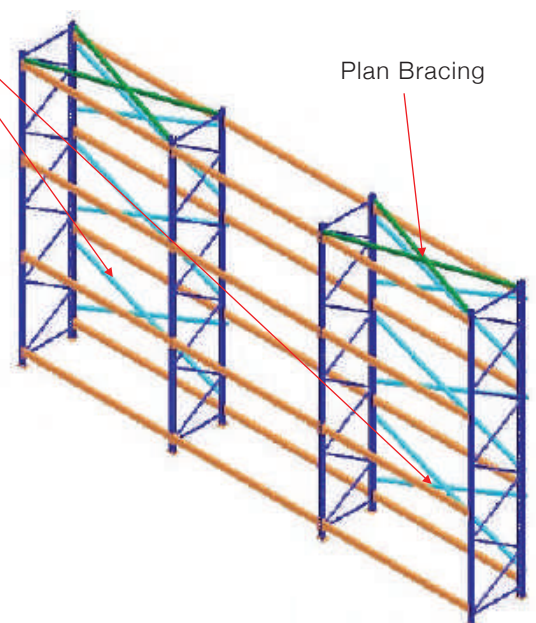

Adding legs for base plate

Back Bracing

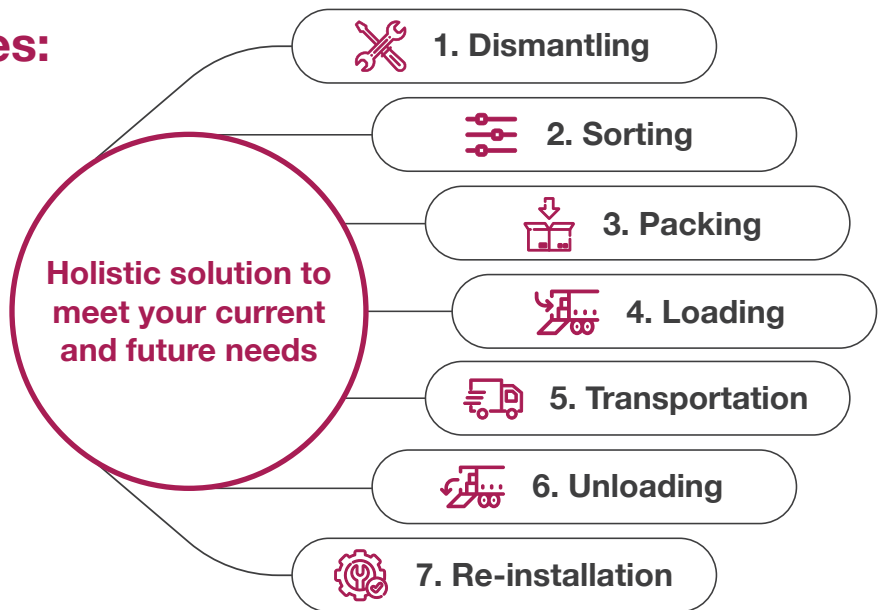

Plan Bracing

4 Relocation Services:

Warehouse relocation involves vital downtime for your business, and our team of experts take charge of every aspect of execution, down to dismantling, sorting, packing, loading, transportation, unloading, and finally re-installation of your storage system to ensure the least impact on your operations.

5 Services for Moveable Systems:

We provide quick troubleshooting and timely support services throughout the product life cycle of Mobile Pallet Racking, Shuttle Racking, Conveyor Systems, Vertical Reciprocating Chutes (VRCs).

Our services include:

| | |
|---|---|
|  AMC |  Breakdown and Preventive Calls |
|  Spares |  Operations Training |

6 User Training:

User training is important in ensuring manpower safety, proper upkeep of storage systems, adherence to compliance with safe warehouse storage practices, and improvement of efficiency.
